

Postdoctoral Position at  
the  
University Tübingen

The Computational Physics section of the Institute of Astronomy and Astrophysics at the University of Tübingen (IAAT) has an opening for a Postdoctoral Position in the field of

### Computational Astrophysics

Applications are invited for a Postdoctoral research position at the institute of Astronomy and Astrophysics at the University of Tübingen (IAAT). The city of Tübingen is a picturesque old town in Southwest Germany with a relatively large student population.

The research activities of the Institute include Astronomy, Instrumental Design/High Energy Physics, Computational Astrophysics and Relativistic Astrophysics. The focus of research of the Computational Astrophysics group lies in the field of planet formation and the physics of accretion disks.

The successful applicant will carry out original research in the group of Professor Wilhelm Kley. Experience in performing magnetohydrodynamical (MHD) simulations is highly desirable.

The appointment is initially for two years with the possible extension for up to 6 years, and paid according to German public service scale. The position gives the opportunity to obtain the German habilitation degree and requires some teaching. Applicants should send a curriculum vitae, statement of research interests, bibliography and the names (address, email) of three potential referees to the address below.

Deadline for receiving the applications is 31 January, 2010.

Prof. Dr. Wilhelm Kley  
Institut für Astronomie & Astrophysik  
Universität Tübingen  
Auf der Morgenstelle 10  
72076 Tübingen  
email: wilhelm.kley@uni-tuebingen.de

All applications will receive full consideration until the position is filled.
